

Vehicle-mounted UTV feeder for faster daily work

Feed Train UTV Feeder

For farmers already using a UTV, this is the quick, practical step away from bucket feeding. The UTV Feeder is aimed at larger daily jobs where visible feed level, vehicle-mounted control and fast unloading matter.

The source sheet lists 600 lb capacity for shelled corn, converted here to approximately 272 kg. The same source sheet says the full tank unloads in less than two minutes.

Door-to-door delivery can be arranged across Ireland, the UK and Europe. Peter confirms the shipping quote directly for your destination.

Key Specifications

Approx. 272 kg	Source capacity
Approx. 91 kg	Empty weight
Approx. 160 cm	Width
Approx. 97 cm	Height
Approx. 30 cm	Depth
Approx. 109 cm	Base width
Approx. 10 cm	Auger
Approx. 2.7 m	Control and charging leads
Approx. 41 x 97 cm	Lid opening
Under 2 minutes	Source unload time

Why It Works On Farm

| Translucent tank so the operator can see the feed level.

- | Large lid opening for easier filling and improved feed flow.
- | 10 cm auger serves several feed types, including meal and pellets.
- | Auger height is designed to fill a meal bin or feeding area.
- | Handles front and rear, plus forklift pockets shown in the Feed Train source material.
- | Control leads unplug from the feeder but remain installed on the UTV.

Specifications are converted from Feed Train source material and may vary by feed type, options and current European supply. Speak to Peter before ordering to confirm fit, availability, finance and delivery pricing.
